PROJECTS

Quiz-Application--Java | Internship Project

- The "QuizApp-Java" is a Java-based project that allows to user multiple-choice questions and score tracking.
- All quiz data, user information, and results are stored in a MySQL database for persistence and scalability.

Weather App | Personal Project

- Creating an Android Weather App using Java. To get the weather information I used OpenWeatherMap API. Informations like Temperature, Pressure, Humidity, Weather status, Time of Sunrise and Sunset etc. are passed from the API.
- **Technologies Used:** Java

Personal Portfolio | Personal Project

- The Personal Portfolio Website is a dynamic and responsive web application designed to showcase my professional profile, skills, projects, and achievements. The portfolio provides a comprehensive view of my work and serves as an interactive resume for potential employers and collaborators.
- **Technologies Used:** HTML, CSS, JavaScript, Bootstrap, Font Awesome.

PROFESSIONAL EXPERIENCE

Java developer intern| Innobyte Services, New Delhi

11 June-5 July 2024

- As a Java Developer at Innobyte Services, I will be responsible for designing, developing, and maintaining Java-based applications. I will work closely with cross-functional teams to deliver high-quality software solutions that meet client requirements and enhance user experience.
- In this internship I create the Quiz Application using Java in this project All quiz data, user information, and results are stored in a MySQL database for persistence and scalability.
